TECHNICAL SKILLS

LANGUAGES
Python, JavaScript (ES6+), TypeScript, SQL

FRAMEWORKS
Node.js, Express.js, React.js, Vue.js, Next.js, Frappe, Tailwind CSS

DATABASES
MongoDB, PostgreSQL, MariaDB

DEVOPS & TOOLS
Git, Linux (Kali) administration, CI/CD, unit & integration testing

AI & AUTOMATION
GitHub Copilot, Gemini, Cursor, Telegram Bot API, n8n, Zapier

EDUCATION

B.Sc. in Software Engineering
Addis Ababa Science and Technology University
Graduated June 2024

LANGUAGES

English – Fluent
Amharic – Native

PROFILE

Full-stack Software Engineer with 2+ years of hands-on experience building scalable web applications, automation bots, and custom ERP modules. Strong in Python and the JavaScript ecosystem (Node.js, React.js), with solid experience in Linux (Kali) and Git-based workflows. A regular user of AI coding assistants with a keen eye for rigorous automated tests, evaluating complex codebases, and designing edge-case engineering tasks.

PROFESSIONAL EXPERIENCE

Software Engineer (ERPNext & Frappe Developer) — 2024 – PRESENT
Tibeb Technology • Addis Ababa, Ethiopia

- Developed and deployed custom enterprise applications for property management, inventory, and recruitment using Python and the Frappe framework.
- Wrote and maintained automated unit and integration tests to ensure the stability of complex backend logic and API endpoints.
- Managed version control and collaborative workflows with Git; participated in code reviews to uphold code-quality standards.
- Used AI coding tools to optimize database queries, generate boilerplate tests, and accelerate development of standard modules.

Full-Stack & Automation Developer — 2026
Upwork (Freelance) • Remote

- Architected technical setups for client systems, including multi-tier customer hierarchies and custom Python scripts.
- Integrated third-party services and automated workflows using Telegram bots and workflow automation tools.
- Produced detailed technical documentation and step-by-step guides for all deployed solutions.

Web Development Intern — JUN – SEP 2024
Kiloli and Tripways Software Company • Addis Ababa, Ethiopia

- Collaborated on full-stack web applications, gaining hands-on experience in frontend UI and backend API integration.
- Assisted in debugging, testing, and resolving issues across the development lifecycle.

SELECTED PROJECTS

Asynchronous File Converter Telegram Bot *Python · Telegram Bot API · asyncio*

- Built a robust bot that converts user files dynamically through asynchronous processing pipelines, with memory management for file streams and edge-case handling for concurrent requests.

Full-Stack Music Player Application *React.js · Node.js · Express · MongoDB*

- Built a complete audio streaming platform with advanced frontend state management, cross-component synchronization, and secure, efficient audio streaming on the backend.

Tender Management System *Full-stack web application*

- Developed a full-stack web application for managing tender processes.

Source code available as private repositories on request.
