PROFESSIONAL SUMMARY

Full-stack Software Engineer with over 2 years of hands-on experience in building scalable web applications, automation bots, and custom ERP modules. Strong technical proficiency in Python and JavaScript ecosystem (Node.js, React.js), backed by solid experience working within Linux environments (Kali Linux), and Git version control. Regular user of AI coding assistants with a keen eye for writing rigorous automated tests, evaluating complex codebases, and designing edge-case engineering tasks.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript (ES6+), TypeScript, SQL
- **Frameworks & Libraries:** Node.js, Express.js, React.js, Vue.js, Next.js, Frappe, Tailwind CSS
- **Databases:** MongoDB, PostgreSQL, MariaDB
- **DevOps & Tools:** Git, Linux (Kali) System Administration, CI/CD, Automated Testing (Unit/Integration)
- **AI Tools & Integrations:** GitHub Copilot, Gemini, Cursor, Telegram Bot API, n8n, Zapier

PROFESSIONAL EXPERIENCE

Tibeb Technology | Addis Ababa, Ethiopia
Software Engineer (ERPNext & Frappe Developer) | [2024] – Present

Developed and deployed custom enterprise applications for property management, inventory, and recruitment using Python and the Frappe framework.

- Wrote and maintained automated unit and integration tests to ensure the stability of complex backend logic and API endpoints.
- Managed version control and collaborative workflows using Git, participating in code reviews to maintain high code quality standards.
- Utilized AI coding tools to optimize database queries, generate boilerplate tests, and accelerate the development of standard modules.

Upwork / Freelance | Remote
Full-stack & Automation Developer | 2026

- Architected and implemented technical setups for client systems, including multi-tier customer hierarchies and custom scripts in Python.
- Integrated third-party services and automated workflows using Telegram bots and workflow automation tools.
- Provided detailed technical documentation and step-by-step guides for deployed solutions.

Kiloli and Tripways Software Company | Addis Ababa, Ethiopia
Web Development Intern | [June, 2024] – [september, 2024] (3 Months)

- Collaborated on the development of full-stack web applications, gaining foundational experience in frontend UI implementation and backend API integrations.
- Assisted in debugging, testing, and resolving issues across the development lifecycle.

SELECTED PROJECTS *(Available as private codebases for task generation)*

- **Asynchronous File Converter Telegram Bot (Python):** Developed a robust Telegram bot to handle and convert user files dynamically. Engineered complex asynchronous processing pipelines, memory management for file streams, and edge-case handling for concurrent user requests. *(Ideal candidate for AI stress-testing tasks).*
- **Full-Stack Music Player Application (React.js, Node.js, Express, MongoDB):** Built a complete audio streaming platform. Implemented advanced state management on the frontend and secure, efficient audio data streaming on the backend, ensuring optimal performance and cross-component synchronization.
- **Full stack tender management system**

EDUCATION

Addis Ababa Science and Technology University | Addis Ababa, Ethiopia
Bachelor of Science in Software Engineering | Graduated: June 2024

LANGUAGES

- English (Fluent)
- Amharic (Native)
